Web Development Immersive

University of Massachusetts - Amherst
· Sept. 2010 to May 2014
Bachelor of Science in Economics and Public Health

Interests

Sneakers, Basketball, Photography, Street Culture, History

About Me

I am a full stack developer. Excited to use and further develop my technical skills in collaborative and cohesive environments. Adept at creating responsive Full-Stack CRUD websites from concept to design to deployment. I enjoy working with dynamic team members and contributing to innovative projects.

Work Experience

General Assembly
New York, NY

Web Dev Immersive Student
Oct. 2018 to Jan. 2019

• Built and deployed fullstack web applications using HTML, CSS, Javascript, React, Ruby on Rails, Node, and Express
• Integrated third-party web APIs
• Worked on agile teams and collaborations through Git

United Auto Workers
New York, NY

Data Analyst
Aug. 2016 to Oct. 2018

• Verified physical documents, reconciled differences between data and documentation, reviewed records and documents for validity.
• Generated reports to give to floor organizers to win three campaigns to form unions for graduate and postdoctoral students at Columbia University and the New School.
• Transcribed and produced short video clips to market union support for over 20,000 students.

State Street
Hadley, MA

Operations Analyst
Oct. 2014 to Aug. 2016

• Provided analytical and technical support for over thousands of trades ensuring they meet eligible requirements and are processed in a timely manner on accounting and custody.
• Spearhead the creation of a global virtual team to handle the high influx of forward mortgage-backed securities and ensuring timeliness on position breaks.
• Reduced the volume of repurchase agreements by 70% with the collaboration of internal parties to allow trades to go straight through processing.

Projects

SneakerCritic
• Worked on a team of 3 over the course of 4 days. Created a sneaker blog/review single page application with full CRUD
• JavaScript, React.js, Express.js, Sequelize, PostgreSQL

Novels
• Designed an application similar to Goodreads where users log in, add books to their profile and perform full CRUD on the comments section
• JavaScript, React.js, Ruby on Rails. PostgreSQL, JWT Auth

Harry Potter
• Built and deployed RESTful application using a third party API
• JavaScript, React.js, HarryPotter API

Flip Drip Skip
• Created a classic twist of Rock Paper Scissors with sneaker brands using vanilla JS
• JavaScript, HTML, CSS
